UBC Precision Bearing Manufacturing Co., Ltd.
An **IKO** Company

Discover **UBC**[®]

UBC Precision Bearing Manufacturing Company is a manufacturer of standard bearings for aftermarket & OEMs as well as specific design engineered bearings for special applications since year 2001.

Being as a dependable brand with reliable quality and professional service at competitive prices, UBC products are the perfect alternative for customers who intend to reduce costs without compromising bearing performance.

In April 2018, UBC became a 100% subsidiary of IKO Nippon Thompson Group of Japan, a world leading manufacturer of Needle Roller Bearings and Linear Motion Rolling Guides and Components. Making the most of IKO's know-how and its resources, UBC has significantly boosted its performance, brand awareness and recognition worldwide.

Years of accumulated experience in the bearing industry has given UBC the advantage, the know-how and necessary expertise for the development and production of technological value-added bearings, particularly for the power transmission industry like gearbox and speed reducer, air compressors and pumps, heavy industry applications in construction machinery, cranes, oil & gas, steel, mining, power generation, sugar mills, etc...

To ensure that customers receive an exceptional engineering support, before and after sales, our team of technical engineers provides technical support both online and on site upon request.

Our factory is located in Suzhou, China with ISO 9001 and IATF 16949 certified by SGS together with Japanese quality control.

UBC Brand Positioning

UBC Product Range

Cylindrical roller bearings

Tapered roller bearings
(metric & inch design)

Spherical roller bearings

Deep groove ball bearings

Customized ball bearings for
electric motors (EMQ5)

High precision angular
contact ball bearings
